

AXT X11 Turbocharger Upgrade Kit for the Mazda Bravo/ Ford Courier 2.5L TDi

X11 Upgrades:

In order to provide maximum durability under heavy load conditions, the X11 Upgrade system features:

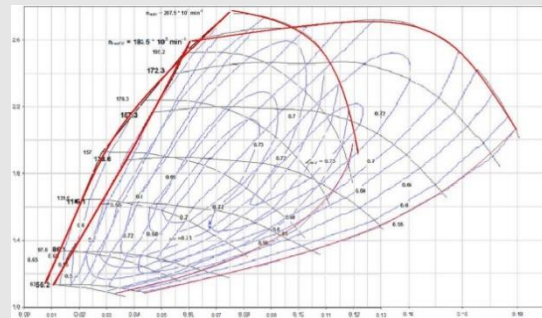

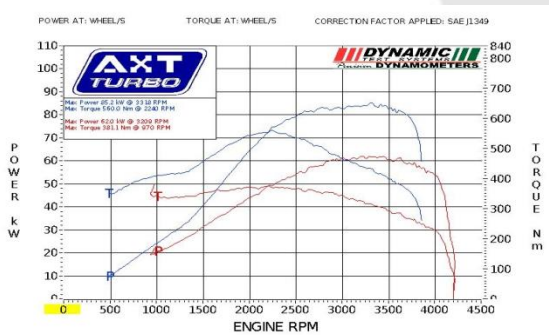

- Upgraded System Bearings
- 360 Degree Thrust Washers and Collars
- Revised Clearances and Wheel Geometry
- Custom 5axis Milled Billet Compressor Wheel
- Precision Balanced to accuracy greater than OEM specs.

This results in a turbocharger designed to extend longevity, reliability and performance in even the worst of operational conditions.

RELIABLE power gains are possible with improvements SAFELY supporting up to 50% more airflow!

The graphs below give an indicative figure of the airflow improvements between a standard and our AXT X11 Series Turbocharger. The dyno sheet highlights the performance improvements when combined with the correct options to suit your specific needs.

X11 Upgrade Kits available to suit all Mazda Bravo/Ford Courier variants with the 2.5l TDI engine!

To unleash the full power potential, X11 Compatible Upgrades include:

Liquid/Air Intercooler, Exhaust System, and AX Tuner Tuning Module
